WORK EXPERIENCE

Front End Developer - JSDigital (March 2023 – February 2026)

- Managed and updated WordPress plugins while identifying and fixing user interface bugs to improve overall site performance and user experience.
- Developed multiple landing pages and interactive prototypes using HTML, CSS, JavaScript, and Shopify, including custom product listings built with Liquid and AJAX for enhanced frontend interactivity.
- Handled frontend development and WordPress dashboard customization (including ACF setup and content integrations) for five multi-page WordPress websites

PROJECTS

ByteHive Web Application (Capstone)

- Developed and design web application inspired by Stack Overflow, integrating essential features using core technologies like ReactJS, NextJS, MongoDB, NextUI, ShadCN, Tailwind, NextAuth, and TinyMCE
- Implemented key functionalities, including user authentication and registration and via the Google platform, allowing ByteHive users to post questions, comment on others' questions, and like posts from fellow users.

Full-Stack E-Commerce Platform

- Database & Architecture:** Designed a relational schema using SQL to manage complex one-to-many and many-to-many relationships for products, users, and orders with supabase.
- Backend & Security:** Engineered a type-safe Express/TypeScript API featuring JWT (Access/Refresh tokens), RBAC, OTP verification, and Bcrypt hashing.
- Data Integrity:** Implemented Zod for schema-based input validation and Rate Limiting to harden the system against brute-force attacks.
- Frontend & State:** Developed a responsive React dashboard using Shadcn UI, leveraging TanStack Query for server-state caching and Zustand for global state.
- Automation:** Integrated automated Email Services for password resets and account verification to ensure a professional user lifecycle.

SKILLS

- Programming Languages:** HTML, CSS, Javascript, Typescript, PHP, SQL
- Frontend:** ReactJS, NextJS, Tanstack Query, React Hook Form, Zod Validation, Zustand
- UI & Styling:** Tailwind, ShadCN, NextUI, Figma, Framer Motion
- Tools:** Git, Github, Postman,
- Backend & Databases:** NodeJS, Express, Postgresql, Supabase, MongoDB
- CMS:** Wordpress, Shopify

EDUCATION

Aurora State College of Technology (September 2018 - June 2021)- Associate Degree (Agriculture)

Pangasinan State University, Philippines (September 2016- June 2018) - Senior High School
(Information Technology (IT Strand))

TRAININGS

Full Stack Web Development - Village 88 (January 2024 – April 2024)

After undergoing 16 weeks of thorough and demanding training, I've gained industry- standard expertise in Full Stack web development. This included completing over 150 mandatory and optional assignments, along with four exams and a specialization capstone project.

CERTIFICATIONS

Village 88 (January 2024 – April 2024)

- Proficient in Web Fundamentals** – Successfully replicated a website using HTML, CSS, and LESS within an 8-hour timeframe.
- Proficient in PHP** – Developed a CRUD-based list with Title and Content using Code Igniter 3 MVC Framework, PHP, MYSQL, HTML, and CSS, completed in 8 hours.
- Proficient in JavaScript** – Crafted a multiplayer game enabling users to add square shapes, select various colors, and view other players' cursors and shapes. Achieved using JavaScript, Node JS, Express, Socket IO, HTML, and CSS within a 7-hour timeframe.
- Proficient in Front End Development** – Constructed a task logger with categorized tasks and userassigned statuses using React JS, HTML, and CSS, completed within 7 hours
